Simple Beamer Class

Ryan Wojtyla, Eric Pereira, Josef Bostik, Thomas van Haastrecht

April 24, 2019

Game type

- Turn based

- Strategy
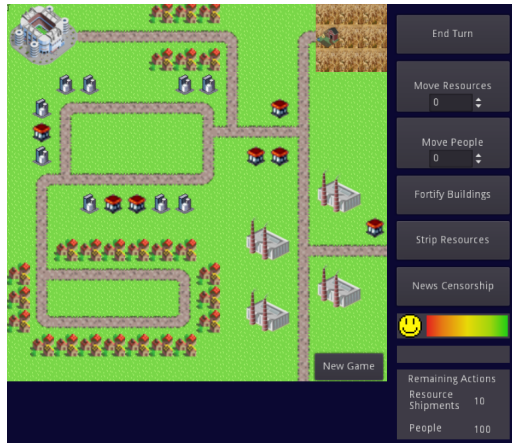

- Resource management

- Apocalypse preparation

- The world is ending in nuclear fire and your job is to keep your citizens safe.
- Actions must be taken to maximize survivability.
- Choose how much information to divulge to the population.
- Time is limited!

- Reallocate resources and people

- Designate key buildings

- Fortify key buildings

- Get the highest score possible!

Buildings

- Stadium - High cost to fortify, but offers a high population capacity
- Factory - Good for starting resources, and has a high base integrity.
- Apartment - Low upgrade cost, decent population capacity, and also good for starting resources
- House - Easy to upgrade, but doesn't offer much else. Good for the early game.
- Farm - Difficult to upgrade, but offers more resources, beneficial for end game.

- Population - Saving as many people as possible is the ultimate goal
- Resources - Determines for how long your people survive
- Structural Integrity - Determines which buildings will survive the initial nuclear blast.
